Public Trust and State's Best Interests Analysis:

The subject dock and appurtenant facilities are for the docking and mooring of boats. Recreational boating is water-dependent and is generally consistent with the common law public trust doctrine. The California Legislature has identified private recreational boating facilities as an authorized use of public trust lands (Public Resources Code 6503.5). The subject structures are privately owned and maintained. The adjacent upland parcel is privately owned and developed with a residence.

The proposed lease includes certain provisions protecting the public use of the proposed lease area, including a limited lease term of 10 years, and a non-exclusive use provision.

The dock and appurtenant facilities have existed for many years at this location; the facilities do not significantly alter the land, the lease does not alienate the State's fee simple interest, and neither permanently impairs public rights. Upon termination of the lease, the Lessee may be required to remove any improvements and restore the lease premises to their original condition. Based on the foregoing, Commission staff believes that the dock and appurtenant facilities will not substantially interfere with public trust needs, at this location, for the foreseeable term of the proposed lease.

The bank protection is consistent with the common law public trust doctrine because it serves as an aid to navigation by providing reinforced structural support to the banks of the waterway and limiting potentially harmful erosion of the bank into the waterway. The bank protection also confers benefits to the upland owner by ensuring sufficient sub lateral support to the adjoining property. Like the dock and appurtenant facilities, the bank protection has existed for many years at this location and does not significantly alter the land or permanently alienate any State property interest. Based on the foregoing, Commission staff believes that the bank protection is consistent with the public trust doctrine. In the alternative, Commission staff believes that the bank protection will not substantially interfere with the public trust needs at this location for the foreseeable term of the proposed lease.

The proposed lease requires the lessee to insure the lease premises and indemnify the State for any liability incurred as a result of the lessee's activities thereon. The lease also requires the payment of annual rent to compensate the people of the State for the occupation of the public land involved. For all the reasons above, Commission staff believes the

issuance of this lease is consistent with the common law public trust doctrine and in the best interests of the State.

OTHER PERTINENT INFORMATION:

1. Applicant owns the upland adjoining the lease premises.
2. On August 8, 2005, the Commission authorized a General Lease – Recreational and Protective Structure Use to The Edward R. Bronder Family Trust, DTD 3/15/04 Edward R. Bronder, Trustee. That lease expired on August 7, 2015. On July 1, 2015, the upland property was deeded to Outsourced Legal Support, LLC, a California Limited Liability Company. The Applicant is now applying for a General Lease – Recreational and Protective Structure Use.
3. Staff recommends the issuance of the proposed lease, as it promotes Strategy 1.1 of the Commission's Strategic Plan to deliver the highest levels of public health and safety in the protection, preservation, and responsible economic use of the lands and resources under the Commission's jurisdiction.
4. The staff recommends that the Commission find that this activity is exempt from the requirements of the California Environmental Quality Act (CEQA) as a categorically exempt project. The project is exempt under Class 1, Existing Facilities; California Code of Regulations, Title 2, section 2905, subdivision (a)(2).

Authority: Public Resources Code section 21084 and California Code of Regulations, Title 14, section 15300 and California Code of Regulations, Title 2, section 2905.

5. This activity involves lands identified as possessing significant environmental values pursuant to Public Resources Code section 6370 et seq., but such activity will not affect those significant lands. Based upon the staff's consultation with the persons nominating such lands and through the CEQA review process, it is the staff's opinion that the project, as proposed, is consistent with its use classification.
